

1. The work and the released version

This declaration covers one released version. Name the cut, edition or localisation.

Title of the work

Released version: cut, edition or localisation

2. Classification

Tick the one category that describes the highest level of AI involvement in the version named above. If you cannot establish the facts, do not tick a box: the classification is unresolved and no declaration is made yet.

☐ **No AI Used**

No AI output appears in the finished film. No AI tool produced any element of the finished work as distributed. Development-only AI with no output in this version does not prevent this.

☐ **Assistive AI**

AI output is present in the finished film, but the AI processed or optimised material created by human crew rather than originating new content.

☐ **Generative AI**

AI originated content that appears in the finished film, rather than processing human-created material.

3. Factual use summary

What the AI did, and what output reached the finished work. One or two lines is enough. Where a use is small or isolated, say what it is, where it appears and roughly how much: that does not change the category.

AI tools used, if you wish to list them. Supporting information only, not a substitute for the summary above

If you need more space, attach the optional continuation sheet. Any attached continuation sheet forms part of this declaration.

4. Declaring party

Production company or lead producer

Name and role of the person signing

I am authorised to make this declaration on behalf of the declaring party. I declare that, to the best of my knowledge, the classification above is accurate for the released version of the work identified in section 1. Any continuation sheet identified as part of this declaration is included in the declaration signed below. This declaration states facts about AI output in that version. It does not state that any consent, licensing, compensation, rights, contractual, insurance or regulatory requirement has been met.

Optional continuation sheet: Factual use summary

HPF Standard v0.9.3 · Form revised 30 September 2026

Use this page if you need more space for Section 3 of the HPF AI Disclosure Form. You may describe each use separately, including what the AI did, what output reached the finished work and, where useful, where it appears and roughly how much of the work is affected.

This page forms part of the declaration. Providing additional detail does not change the production’s HPF classification.
